

Adult Education Advisory Group

RSU 24 Adult Education would like to establish an advisory group that will contribute to the development of adult education programs to best serve our communities. Ideally, members will have an intuitive willingness to participate because they realize the positive impact that adult education can have on our communities. Group members can be the ears, eyes, and voice of our district by understanding what AE offers now and contributing ideas for continual improvement and growth. Discussions will be in the context of providing services ranging from Basic Literacy through entrance to post-secondary enrollment, work force training to meet individuals and local employer's needs, and continuing community education.

Membership will include: business owners/representatives, partner organizations, local community members, students, educators, and an RSU 24 Board member. Meetings will most likely be scheduled quarterly, with sub-groups meeting if needed. The advisory group is not intended to be a governing board.
