

Hello, I am Mr. Tibbetts, the physical education teacher at Mountain View. I am hoping to get a climbing wall in the gym at MVS. I have researched prices, around \$5,000 for the project. I am hoping the board will approve this to become a Donors Choose project. I previously have received lacrosse equipment from Donors Choose.

I plan to use this wall in my PE classes. Climbing works on strength, endurance, flexibility, and works the brain as well. It is important to plan out moves in order to make it across the wall. Climbing also helps with motor skills, movement patterns, and responsible behaviors.

This wall will always be used under supervision, and with mats underneath. It is a shortened wall for safety, so no kid will be going too high off the ground. Thank you for your time and consideration.

Dylan Tibbetts
